

Benchmarking[®]

The international score comparison 2020.

Benchmarks with public visibility

Historical overview Top Five 2020.

Our public benchmarks as well as the certification benchmarks help network operators around the globe to demonstrate how well they deliver wireless connections to consumers, business users and enterprises while revealing the areas of improvement.

Using our experience in the field of network-testing of mobile networks we verify and certify the performance of mobile services.

The umlaut score and service certification is the ideal tool for the independent assessment and attestation of mobile networks and the services they offer.

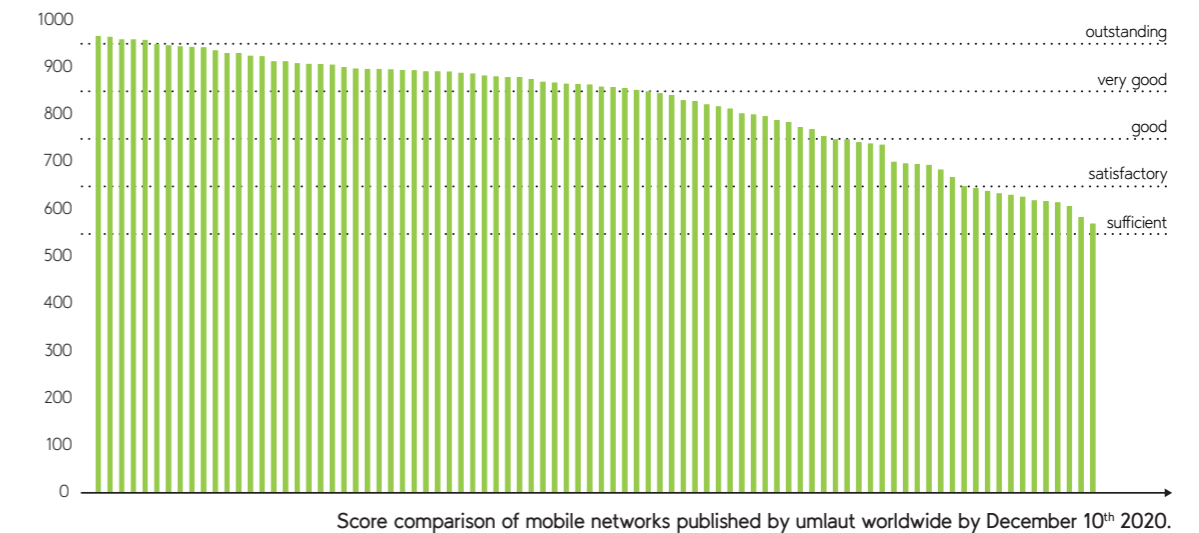

Benchmark results

Top 5

- 962: T-Mobile, NL
- 960: Swisscom, CH
- 955: Sunrise, CH
- 955: Magenta, AT
- 954: KPN, NL

umlaut Scores — worldwide applied

The graph shows the overview of all umlaut Score results collected internationally since 2020 and highlights the top 5 performing networks. Update activities under the new 2021 framework

will show in the course of this year, if and how the inclusion of 5G and the innovations introduced in the user experience testing will change the group of front runners.
